

Project Title: Machine Learning for Scene Classification and Environment-Driven Song Selection

Thank you for considering participation in this research project. The aim of this study is to evaluate a system that recommends songs based on the visual content of an image using machine learning and natural language processing. Your participation involves reviewing a set of images and evaluating how appropriate the system-generated music selections are, based on your personal perception.

Duration and Nature of Participation

The study will take approximately 20 minutes. You will be asked to review a series of images and associated song recommendations and then answer a few short questions.

Data Handling and Anonymity

Your responses will be recorded and used solely for the purposes of academic research and assessment. All data will be anonymised.

Voluntary Participation and Right to Withdraw

Your participation is entirely voluntary. You may choose to withdraw from the study at any time, without providing a reason and without penalty. If you choose to withdraw, your data will be removed and not used in the research.

Consent

By taking part in this study, you confirm that:

- You have read and understood the purpose and structure of the research.
- You are participating voluntarily.
- You understand that you can withdraw at any time.
- You understand that your data will remain anonymous and confidential.
